HP Elite 7500 Microtower PC

Upgrade to amazing

A small business PC designed for performance, style and xpandability with Beats Audio™.

HP recommends Windows® 7.

State-of-the art computing

Your small business computing needs can change at the click of a mouse. You need a PC that can keep up. The HP Elite 7500 is designed to give you the high performance you need for today's process-intensive and graphics-rich applications and the sleek new design complements any home office or small business environment.

Technology for today and tomorrow

Intel® Core™ i3, Core i5 or Core i7 3rd Generation processors[1] provide top speeds and multiple cores for some of the most demanding applications you'll ever need to run. Paired with the powerful Intel H67 Express Chipset, you get a PC that's affordable and performance ready.

Flexibility at your fingertips

Including four memory slots, PCI Express slots, internal and external drive bays, the HP Elite 7500 Microtower Business PC is designed for customization and expansion.

Data is what it is all about, and your files aren't getting any smaller. USB 3.0 ports give you higher transfer rates than USB 2.0 in order to match the new usage and larger devices being developed.

The highly expandable HP Elite 7500 Microtower is intended to fit a wide range of space and configuration requirements. The sleek new design with its high-gloss finish and rounded corners is meant to be shown off.

Out-of-the-box productivity

The HP Elite 7500 does all the heavy lifting with no matter how extensive a list of features you desire. Configuration options include a variety of optical drives and hard drives, and memory configurations up to 16GB[2]. Dual hard drives can be structured in a RAID configuration to automatically back up and protect your stuff. And, with preinstalled software like the HP Power Assistant[3], you get a PC equipped to make an impact right out of the box.

Give your business a boost

With Beats Audio™, HP has engineered an audio system that unlocks all of the sounds musicians and producers have perfected in the studio. You hear the highs, lows and subtle in-betweens like never before.

Plus, the HP Elite 7500 offers business class service and support so you can spend your time focusing on what's most important—your business.

HP Elite 7500 Microtower PC

HP recommends Windows® 7.

Dimensions	16.5 x 37.3 x 36.5 cm
Weight	Starting at 9.60 kg
Power	300W standard efficiency, active PFC
Expansion Solutions	1 PCIe x16; 3 PCIe x1; 1 mini PCIe; 1 15-in-1 Media Card Reader Two 13,3 cm (5.25") ; Two 8,9 cm (3.5")
Warranty	Protected by HP Services, including a 1-1-1 standard warranty. Terms and conditions vary by country and/or Business Model.

[1] Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel® 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

[2] Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.

[3] HP Power Assistant enhances management of the system energy requirements and enables users to take control of their power consumption for a reduced impact on the environment. Power calculations and cost calculations are estimates. Results will vary based on variables, which include information provided by the user, time PC is in different power states (on, standby, hibernate, off), time PC is on battery or AC, hardware configuration, variable electricity rates, and utilities provider. HP advises customers to use information reported by HP Power Assistant for reference only and to validate impact in their environment. Environmental calculations were based on U.S. EPA eGrid 2007 data found at www.epa.gov/egrid/. Regional results will vary. Requires Microsoft Windows.
